Fax: +33(0) 4 99 74 91 52

SPECIFIC POLYMERS est cofinancé par l'Union Européenne

L'Europe s'engage en Languedoc Roussillon avec le fonds européen de développement régional

Thanks to its increasing activities, **SPECIFIC POLYMERS** has moved to its **own new labs** with four-fold increase workspace (600 m<sup>2</sup>).

Its result in producing **higher quantities** (kg for our successful polymers), and **more monomers and polymers** : over **600 references in our catalog**.

This also include the **futur recruitment of Doctors and Technicians**.

- Team 2013: 3 PhD, 2 Engineers, 2 Technicians and 1 Administrative post.
- Team 2014: more than 12 employees.

**Since 10 years, SPECIFIC POLYMERS** has been helping companies to develop new products and improve existing ones through its broad **experience in oligomers, polymers and organic monomers with functional groups and/or hetero-elements (Fluorine, Silicon, Nitrogen, Sulfure, Phosphorus, etc.)**.

**SPECIFIC POLYMERS** has collaborated with customers that include some of the largest multi-national chemical companies in a wide variety of applications including industrial and academic R&D

With more than 600 commercial and custom products, we certainly have in our catalog chemicals and expertise to solve your R&D challenge.

Please visit our **on-line catalog** and feel free to request a quote or information.

If you do not found the chemicals you search, our technical staff will be always available to discuss any question you may have.

**SPECIFIC POLYMERS** has all the abilities to handle your development projects from grams to multi-kilograms and has a toll manufacturer for industrial scale production.
